

Project Details

ROSES ID: NRA-01-OSS-01

Selection Year: 2002

Program Element: Independent Investigation: Geospace LWS

Project Title:

Long-Term Dynamics of the Trapped Radiation Slot Region

PI Name: Stuart L. Huston

PI Email: atn@g.ucla.edu

Affiliation: Boeing Phantom Works

Summary:

We propose to conduct a study of the long-term behavior of the slot region of the Earth's trapped radiation belts using data primarily from the NOAA POES spacecraft. This effort will cover over two solar cycles worth of data, and will concentrate primarily on the frequency and intensity of transient radiation belts such as the one observed in March 1991. The study will also develop a statistical description of the energetic proton flux levels experienced in the region 2
