

Project Details

ROSES ID: NNH05ZDA001N

Selection Year: 2006

Program Element: NSF Partnership

Project Title:

Quantitative Validation and Assessments of Solar/Heliospheric 3D Model Codes Using Empirical Data from Remote-Sensing and In Situ Measurements

PI Name: Leonard Strachan

PI Email: atn@g.ucla.edu

Affiliation: Smithsonian Astrophysical Observatory

Summary:

We propose to use current and future MHD codes to construct 3D time-dependent models of the coupled Sun/heliosphere system for specific time intervals. Observations from SOHO, ACE, WIND, Ulysses and other solar/heliospheric missions will be used as benchmarks to test the model results. We will work with the developers of the 3D MHD codes to produce test metrics that will provide an independent and quantitative assessment. The models, test results and related software tools will be shared with the code developers and other researchers.
