

## Project Details

**ROSES ID:** NRA-NNH04ZSS001N

**Selection Year:** 2005

**Program Element:** Data, Tools, & Methods

**Topic:** To quantify the response of thermospheric density and composition to solar and high latitude forcing.

**Project Title:**

A Comprehensive Statistical Analysis of Thermospheric Neutral Wind Measurements; Building a Testing a New Reference Model

**PI Name:** Douglas Drob

**PI Email:** douglas.drob@nrl.navy.mil

**Affiliation:** US Naval Research Laboratory

**Project Member(s):**

-

**Summary:**

Based on the success and failures of the HWM-93 model, we propose to construct a new empirical wind reference model to answer several important science questions relating to the place of thermospheric winds in the broader LWS objectives. Our new model will also serve as the benchmark for future scientific investigations and numerical simulations of the thermosphere/ionosphere system.
